Key Terms

- Fund distribution date* is the date on which the Excess of Reportable Income over Distributions is treated as received by investors for UK tax purposes.
- ISIN code* is short for International Securities Identification Number; a unique security identifier of the fund share class.
- Income distributed per share* is the per share amount of income the fund distributed to shareholders.
- Date on which distribution was made* is the effective date (i.e. date on which the fund value dropped by the dividend amount).
- Excess of reportable income over distributions* is the amount of income reported per share in excess of what was distributed to shareholders.
- Total income to be declared* includes the distribution per share and the excess of reportable income over distributions. Please confirm with your tax advisor the amount that should be reported on your tax form under your particular circumstances.
- Average equalisation amount – investor level* – Vanguard operates an equalisation policy for Vanguard Investment Series plc in order to mitigate the tax impact of subscriptions and redemptions on investors in the fund. The equalisation amount is relevant to investors who have made an initial purchase of fund units part way through its reporting period and still hold an interest at the period end (as opposed to investors who have held units throughout the period). These investors should be able to use the average equalisation factor to calculate their equalisation amount and then deduct this when calculating their own taxable income. However, investors who purchased ETF shares on the secondary market generally do not qualify for equalisation. Please note that this disclosure does not constitute tax advice and any investor who is unsure of their tax position in relation to these amounts should contact their tax adviser.
